

Typical Soil Profile Pit Construction

Quantity	Often only one pit is needed. If your site has highly variable soils multiple pits may be excavated.
Location	Pit location should match the area to be used for installation of the on-site wastewater system.
Prepare	Contact Kansas One Call At least 48 hours prior to excavation at: 1-800-344-7233 or dial "811"
Construction	-Slope one end of the pit to provide safe access. -For public safety and for most accurate results, please coordinate excavation time to match the site evaluation time. -Use diagram above and do NOT dig any deeper than 5 feet.
Results	Profile results will be shared with owner & contractor on-site
